The Prison Rape Elimination Act (PREA) was passed in 2003 with unanimous support from both parties in Congress. The purpose of the act was to “provide for the analysis of the incidence and effects of prison rape in Federal, State, and local institutions and to provide information, resources, recommendations and funding to protect individuals from prison rape” (Prison Rape Elimination Act, 2003). In addition to creating a mandate for significant research from the Bureau of Justice Statistics and through the National Institute of Justice, funding through the Bureau of Justice Assistance and the National Institute of Corrections supported major efforts in many state correctional, juvenile detention, community corrections, and jail systems.

The act also created the National Prison Rape Elimination Commission and charged the commission with developing draft standards for the elimination of prison rape. Those standards were published in June 2009 and were turned over to the Department of Justice for review and passage as a final rule. That final rule became effective August 20, 2012.

The San Bernardino County Probation Department (SBCPD) is committed to the care and safety of all youth in our facilities and to the Prison Rape Elimination Act (PREA) Standards. The SBCPD strives to maintain compliance with the PREA Standards for Juvenile Facilities and make improvements to existing policies, practices, education, and trainings as needed.

SBCPD has a zero-tolerance policy for all forms of sexual abuse and sexual harassment of youth. We are committed to the prevention and detection of such conduct, we immediately respond to all allegations of sexual abuse and sexual harassment, pursue appropriate disciplinary action, and refer for investigation and prosecution for those who perpetrate criminal conduct.

PREA requires juvenile agencies to collect and review data “...in order to assess and improve the effectiveness of its sexual abuse prevention, detection, and response policies, practices, and training.” (PREA Standard 115.388a). This review is intended to meet this standard and:

- Identify problem areas
- Taking corrective action on an ongoing basis for each facility
- Preparing an annual report of our findings and corrective action for each facility as well as the agency as a whole.

This report has been approved by the San Bernardino County Probation Department Chief Probation Officer and is available on our website: <http://www.sanbernardinoprobationdepartment.org>

2022 PREA Activities

During calendar year 2022, SBCPD continued its efforts to establish full PREA compliance:

- Governor’s Certification: PREA requires all agencies who fall under the operational control of the executive branch of the government to be in full compliance with the PREA Standards. The Governor of each State must provide certification of full PREA Compliance to the Federal Government that their State is in compliance or working toward compliance. Failure to do so, could result in significant loss of federal funding.
- SBCPD is a local agency and therefore does not fall under the operational control of the executive branch of the government. However, to ensure the safety of our youth and staff, we have taken affirmative action to audit our facilities as recommended by the timelines set forth in the PREA Standards. All of our facilities have successfully completed PREA Audits.

Sexual Violence Reporting

SBCPD participates in the annual Survey of Sexual Victimization conducted by the US Census on behalf of the US Department of Justice. The summary of this report through calendar year 2022 shows the low number of sexual abuse and harassment incidents occurring in our facilities.

SBCPD has zero tolerance for sexual abuse and harassment and is actively working to eliminate these activities in our facilities. The sexual abuse and harassment definitions used for the Survey of Sexual Violence and SBCPD's incident reporting mirror the definitions from the PREA Juvenile Standards.

The ultimate goal of ARISE, Phase I, is to provide the tools and rehabilitative services necessary to prevent recidivism and ultimately a successful reintegration back into the community.

Youth are assigned a caseload counselor who gives the youth a brief program overview and the youth is provided an orientation intended to reduce rule violations and to provide a safe and secure environment for both youth and staff. Following the intake process, youth are further assessed, and housing decisions are made based on classifications.
